

SAMSUNG

Samsung Air Conditioner

2021 AIR CONDITIONER LINE-UP

COMMON CONCERNS WHEN USING AN AIR CONDITIONER

Health Concerns

"I learned that viruses spread easily in enclosed air conditioned rooms, so we try as much as we can to stay in open spaces nowadays. At this point, I'm not willing to risk safety over convenience."

High Electricity Bill

"Even if it's hot, I have to limit my use of the aircon, because I'm scared of our electricity bill will spike up."

Too Chilly and Uncomfortable

"The air directly blown onto my skin makes me feel too chilly and uncomfortable. It always gets in the way of my productivity by daytime or interrupts my sleep at night."

Slow Cooling

"There have been instances when I had to stay under my aircon just to instantly feel cool. I wish there was an easy way that I could get cool easily, once I step inside the room."

Installation and Maintenance

"I find it burdensome to arrange service appointments. Most of the time, I'm not even sure how to reach customer service the easiest way possible."

Too Fragile

"It's so stressful when my aircon breaks down easily in times when I need it the most, especially during hot months."

THINGS TO CONSIDER WHEN BUYING AN AIR CONDITIONER

Space

The size of the room determines the volume of air that needs to be cooled. See table guide on the recommended capacity per room size.

COOLING CAPACITY	WindFree™ MODELS	SPLIT-TYPE S-INVERTER AND WINDOW-TYPE INVERTER MODELS
1.0 HP	up to 16 sqm	up to 15 sqm
1.5 HP	17-20 sqm	16-20 sqm
2.0 HP	21-32 sqm	21-32 sqm
2.5 HP	33-40 sqm	33-40 sqm

Disclaimer: Recommended capacity are estimates based on the average room conditions of a bedroom. Capacity may vary depending on actual room condition.

Users

More people in the room means more body heat and the higher chance of spreading the virus in an enclosed space. When choosing an air conditioner, it is best to consider cooling efficiency and air purifying features.

Heat Source

More occupants mean that the aircon has to generate enough power to cool the place, plus the chances of viruses spreading around and dust created are much higher.

Energy Efficiency

Choose an air conditioner with digital inverter technology to save energy. Samsung's Digital Inverter Boost Technology maintains the desired temperature without frequently turning the compressor on and off, so there's less fluctuation.

Noise

An air conditioner, especially in the bedroom, should have less noise to ensure the family's good night sleep. Samsung air conditioners work much more smoothly and quietly with its stable operation, producing less noise and vibration.

(ONLY APPLICABLE TO WindFree™ PLUS MODELS)

WindFree™ Technology

WindFree™ Cooling efficiently maintains a comfortable level of coolness without the unpleasant feeling of direct cold wind. Cool air is gently dispersed through 23,000 micro holes, creating a comfortable environment while effectively reducing the risk of viral transmissions due to less movement and spread of droplets in the air.

Fast Cooling

The WindFree™ Air Conditioner cools the room like any other air conditioner once the unit is turned on. When it reaches the desired temperature, you can change the mode to WindFree™ Cooling.

Fast Cooling
Big blade cools air
Faster and Better

WindFree™ Cooling
No direct wind & Saves Energy up to
77%* vs Fast Cooling Mode

*Tested on the AR07T9170HA3 model, based on the power consumption of Fast Cooling mode vs. WindFree™ cooling mode.

WindFree™ Cooling

WindFree™ Cooling mode can be set manually on the remote or the SmartThings app. AI Auto Cooling also functions to automatically change the mode depending on your usage pattern.

Air Purifier PM 1.0 Filter

PM1.0 Filter works just like a stand-alone air purifier. Equipped with Electrostatic Chargers, this filter captures and destroys ultra fine particles with its 99% cleaning efficiency. Be assured that the air you breathe is free from dusts, bacteria, viruses, and other harmful substances suspended invisibly in the air.

99%
Anti-bacteria

99%
Anti-virus

98%
Anti-allergy

Air Quality Display

Easily monitor the quality of the air around you with color and numeric indicators. The goal is to reach and keep it at color blue, which means good air quality, all day long.

Easy Maintenance

Maintain the fresh air quality with a clean filter. Locate it from outside, at the top, then easily detach and follow these steps to keep your air conditioner working efficiently with less effort.

FAST COOLING

Fast Cooling

Designed to cool 43%* faster, farther and wider.

The room cools faster because the Digital Inverter Boost technology dramatically shortens the time it takes for the compressor to reach maximum power.

Its advanced design also has a 15% bigger fan, 18% wider inlet and a 31% wider blade. So cool air is dispersed farther and wider into every corner of a room, reaching up to 15 meters**.

* Tested on the AR12TXCAAWKEU model compared with the Samsung conventional model AQ12EASER.
** Tested on the AR24TXFAWKNEU model.

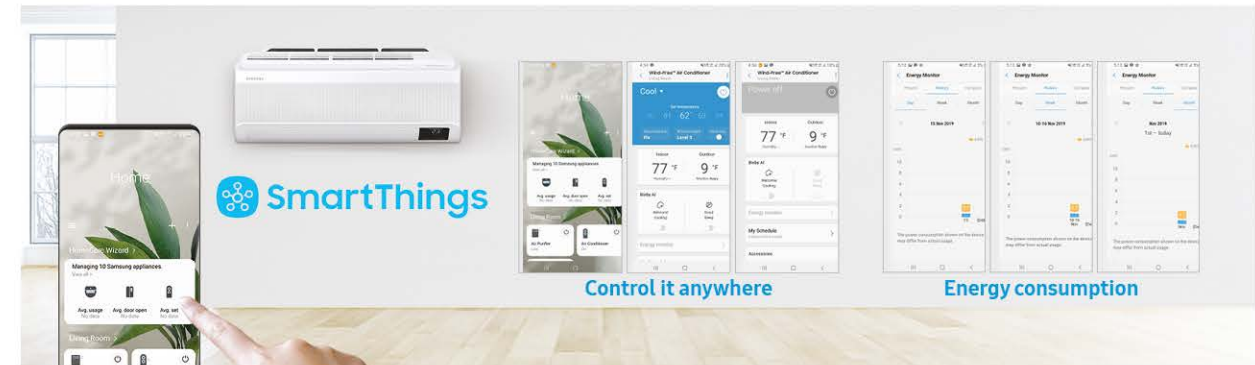

SMART FUNCTIONALITY

(ONLY APPLICABLE TO WindFree™ PLUS MODELS)

SmartThings

Control the air conditioner remotely and monitor its energy consumption from your mobile phone.

* Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required.

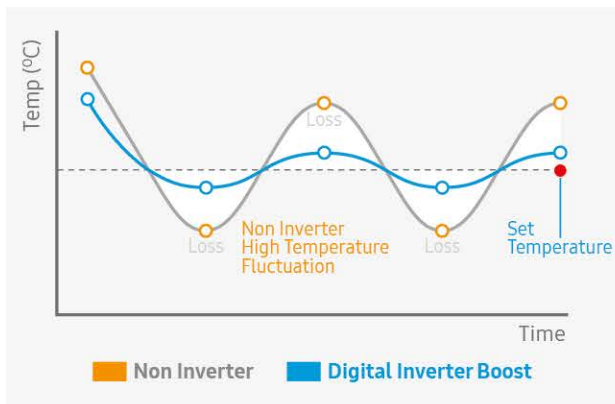

AI Auto Cooling

Automatically optimizes the temperature by analyzing your usage behavior and living conditions.

ENERGY-SAVING

Digital Inverter Boost

Automatic compressor adjustment to save energy. Provides energy savings of up to 73%* with highly efficient Digital Inverter Boost technology that optimizes power usage while producing less noise and vibration.

Save money everyday with the highly energy-efficient Digital Inverter Boost technology. Unlike conventional fixed-speed compressors, it maintains the desired temperature without frequently turning on and off, so there's less fluctuation.

* Tested on the AR09TXCAAWKNEU model compared with the Samsung conventional model AQ09TSLXEA.

It also uses strong magnets made of neodymium and includes a twin tube muffler, so it works efficiently and produces less noise and vibration. It optimizes power usage when cooling to reduce energy consumption by up to 73%*.

Based on your preferred room temperature and the current outdoor temperature, AI Auto Cooling* automatically adjusts** the settings and turns on the most appropriate mode, including WindFree™, Fast Cooling, and Normal Cooling.

* A Wi-Fi connection and a Samsung account are required. ** Stores user data, preferences and usage patterns to suggest the most useful options.

Voice Control

Control your Air Conditioner with voice recognition via Bixby 2.0.

Voice controls supports the following commands

1. Turn on(off) the air conditioner.
2. Turn on(off) the WindFree™.
3. Raise(Lower) the temperature.
4. Change the mode to Dehumidification/Auto/Cooling/Heating.
5. Change the wind strength to Auto/Low/Medium/High.
6. Check the temperature setting of the air conditioner.
7. Check the indoor temperature of the room.
8. Check the fan speed of the air conditioner.
9. Check the mode of the air conditioner.

* Certain models may not support voice control feature.

** Voice control supported in English (US, UK, Indian), Chinese, Korean, French, German, Italian, Spanish, and Portuguese.

DURABILITY

SPLIT TYPE WALL MOUNTED

Triple Protector Plus

Long-lasting performance with advance durability and protection from power surges.

* Normal Working Range : 187Vac ~ 265Vac
 * The voltage value may differ because the voltage ripple value is different depending on the load
 * Tested on the AR12TXEAAWKNEU model compared with the Samsung conventional model AS18FCMID.
 * Tested on the AR10TYCABWKNST model compared with the Samsung conventional model AS18FCMID.

- 1 Compressor Protector prevents damage from unstable electrical condition and low voltage.
- 2 Controller Protector adjusts to avoid breakdown from voltage surge.
- 3 Fin Protection has multi-channel condenser designed with strong corrosion-resistant material to protect from rusting even in harsh conditions.

DuraFin™

Maintains the performance and efficiency of the heat exchanger without becoming corroded.

Enhance the performance and efficiency of the Heat Exchanger using the DuraFin™. It is made of a much denser material and is thicker in design. Its improved coating also has more corrosion resistance. DuraFin™ passed the accelerated Sea Water Acetic Acid Test (SWAAT) for corrosion over 100 days*.

* Based on the AR13TYHYBWKNT model compared with the Samsung conventional model AR18JRFNFWK.

10-Year Warranty Compressor

The Digital Inverter Compressor provides more credible durability with its 10-year warranty.

Samsung also offers 1-year warranty for parts & labor on all wall-mounted split-type air conditioners.

PREMIUM INVERTER WindFree™ Plus

- WindFree™ Cooling
- New Air Purifier PM 1.0 Filter
- SmartThings
- AI Auto Cooling
- Digital Inverter Boost
- New Freeze Wash Cleaning Mode
- Easy Filter Plus
- DuraFin™
- 10-Year Warranty on Compressor

BASIC INVERTER WindFree™

- WindFree™ Cooling
- Digital Inverter Boost
- Tri-Care Filter
- Easy Filter Plus
- DuraFin™
- Triple Protector Plus
- Dehumidification Mode
- Fast Cooling Mode
- Eco Mode
- 10-Year Warranty on Compressor

BASIC INVERTER S-Inverter

- Digital Inverter Boost
- Fast Cooling Mode
- Triple Protector Plus
- Eco Mode
- Easy Filter Plus
- Tri-Care Filter (Optional)
- DuraFin™
- Dehumidification Mode
- Quiet Mode
- R32 Refrigerant
- 10-Year Warranty on Compressor

Upgrade your S-Inverter with Tri-Care Filter

Keep the air clean with the Tri-Care filter, soon to be available as an option for S-Inverter models! Equipped with Zeolite Coating Fiber, it captures fine dusts and potentially harmful particles in the air. Visit www.samsung.com/ph to know more.

Customer Service

Convenient and hassle-free service at your fingertips

CALL

1-800-10-726-7864 [PLDT Toll Free]

RIGHT CARE
RIGHT NOW

Samsung Visual Support

Get hands-on advice from a Samsung Expert with the help of a live camera.

HOW TO ACCESS

Step 1

Call hotline to request for Visual Support.

Step 2

Visual Support consultants will send you a URL link via SMS.

Step 3

Click on the URL link sent via SMS to access Visual Support Agreement. This will request your permission to share the video captured from your mobile device and for the remote access to certain features of your mobile phone like flashlight and camera.

Step 4

Once you have granted Visual Support permission, the consultant on the other end would then be able to analyze the product directly through your phone camera.

*Images are simulated and for illustration purposes only.

ABOUT VISUAL SUPPORT SERVICE

Our Samsung Contact Center's Visual Support provides real-time assistance by our consultants, based on the visuals of the affected product sent by you, our customer.

Should you need assistance with your unit, you may call us through your own smartphone. You will then be asked to accurately describe the problem of the unit. After that, you will receive diagnosis from our consultants. The in-depth analysis provided by our Visual Support team means that consultants can make qualified judgements regarding whether or not a product needs to be sent for repair. Thus, saving you valuable time and effort.

*Images are simulated and for illustration purposes only.

FUNCTIONALITIES

LIVE VIDEO FUNCTION

This function zones in on the problem area using the customer's live video function on their mobile. This eliminates miscommunication and the need to be at the customer service center.

REMOTE ACCESS

Aside from speaking over the phone and streaming video images, our consultant can also remotely activate your phone's flashlight to better assess the situation.

SCREEN ANNOTATION

With the use of a mouse or a finger to annotate your device's screen, both you and our consultant can indicate problem areas, and address them correctly.

Warranty & Repair Service

Access a variety of Samsung services with your Samsung account such as warranty registration and coverage details, callback request, repair tracking and much more.

Visit www.samsung.com/ph/support/your-service/

2.5 HP	AW24AYHGAWKNTC	P 55,995	22,500	660 x 428 x 800	

Fast Cooling

No need to wait long for the room to cool! Cool the room 15% faster than non-inverter air conditioners with Fast Cooling. With this mode, the unit operates with the fastest fan speed to reach the desired temperature in the shortest period of time, before eventually slowing down to maintain such temperature.

Digital Inverter

Save energy up to 61% less than non-inverter air conditioners with the Digital Inverter technology. It maintains the desired temperature without frequently turning off and on to avoid sudden spikes in energy usage.

Anti-Bacterial Filter

Breathe in clean and fresh air with the 3-in-1 Anti-Bacterial Filter. This filter consists of Silver Ion (silver), Vitamin C (yellow), and Anti-Mite (red) that are proven effective in destroying bacteria, allergens, and other airborne contaminants.

SPLIT TYPE FLOOR STANDING

- Full HD Filter
- Turbo Cooling
- Dehumidifier
- 4-Way Air Swing
- Auto Shutter
- Anti Corrosion Fin
- Touch Display Panel
- 5-Year Warranty on Compressor

		MIRAGE		Net Dimension (WxHxD, mm)	
Capacity (HP)	Model	SRP	Cooling Capacity (Min-Max), Btu/hr	Indoor	Outdoor
4.0 HP	AF36MV1MAEENTC	P114,995	36,100 (7,300 - 38,000)	610 x 1850 x 400	880 x 798 x 310
6.0 HP	AF48MV1MAEENTC	P154,995	48,600 (14,000 - 56,000)	610 x 1850 x 400	940 x 1210 x 330

Digital Inverter

The Digital Inverter Technology maintains the desired temperature without frequently shutting the compressor on and off, consuming up to 70% less energy versus non-inverters.

Dehumidifier

The built-in dehumidifier reduces humidity in the air, safeguarding your home from bacteria and mold.

Full HD Filter

The full high density filter can collect up to 60% of bacteria, dust and other allergens.

Commercial Air Conditioners (Single Split)

Comfort cooling solutions to optimize workflow and enhance productivity

Samsung's Commercial Air Conditioning systems use advanced technologies to ensure optimal comfort in any commercial space. The CAC also minimizes running costs and energy consumption in the long run.

Universal Outdoor Unit

The Samsung CAC Single, features a universal outdoor unit that supports all types of Samsung indoor components, including the innovative Wind-Free™ air conditioners, 360 Cassette, as well as Console type air conditioners. Samsung CAC offers you a wide selection of indoor units, to ensure the perfect level of comfort that suits your preference.

Compact Size

Make good use of valuable space with a compact and lightweight size. Its space efficient design, worry-free installation, and easy operation make this the perfect choice for offices.

* The net dimensions of 10kW models are 940 x 998 x 330mm (WxHxD), and 6.9kW models are 880 x 798 x 310mm (WxHxD).

4Way Piping

Unlike conventional front-discharge models, the Samsung CAC Single outdoor unit features a 4-way piping system*. Connections at the front, side, bottom and rear give you flexibility in selecting an installation location.

* Only available on certain models.

Digital Inverter Technology

Unlike conventional fixed-speed compressors, which frequently shut off and switch on, Samsung uses highly energy-efficient Digital Inverter technology to automatically adjust compressor speed in response to changes in the surrounding environment. This ensures optimal comfort and power usage, reducing energy consumption by up to 60%*.

* Based on Samsung's internal test results compared with the Samsung AQV09TWS model. Individual results may vary.

360 CASSETTE

Circular design with omni-directional wind for added style and comfort

The Samsung 360 Cassette offers a brand new way of staying comfortably cool in every corner of the room. An innovative circular design fits perfectly anywhere - it also blows cool air in all directions so the temperature in the whole room spreads evenly. A bladeless outlet ensures that cool air is spread gently without creating a cold draft, expelling 25% more air.

* Within a 9.3m diameter the temperature difference is less than 0.6°C.
 ** Samsung testing compared to a general 4Way cassette type air conditioner. Within a 5m radius, no cold draft between 0-1.5m in height (with 14.0kW).

Comfort Draft-free comfort across large spaces

Add a touch of style to any room and enjoy comfortable, draft-free cooling across a wide area with the Samsung 360 Cassette air conditioner.

Bladeless Design

Conventional 4Way Cassette type air conditioners can create unpleasant airflow that feels like a cold draft. With the 360 Cassette's bladeless design, cool air disperses gently and descends across the room like natural wind, keeping people comfortably cool without the irritating chill on their skin. Its bladeless design allows the airflow to function well in low angles, expelling 25% more air as it spreads across the room evenly, no matter how wide the space is.

* Based on internal testing compared to a general 4-way cassette air conditioner.
 ** Within a 5m radius, no cold draft between 0-1.5m in height (with 14.0kW).

Omni-Directional Outlet

Conventional 4Way Cassette type air conditioners create an uneven air distribution as they only blow cold air on 4 directions, leaving some areas warmer. The 360 Cassette features a circular outlet that blows cool air in all directions, so that every corner of a room enjoys the same temperature**.

* Samsung testing, compared to a general 4Way cassette type air conditioner.
 ** Within a 9.3m diameter the temperature difference is less than 0.6°C.

WindFree™ 4WAY CASSETTE

Cools the room faster without direct wind and consumes less energy

Samsung WindFree™ 4Way Cassette air conditioner cools effortlessly without the feeling of cold wind being blown directly onto your skin*. Maximizing efficiency, it delivers quick, even cooling up to 10 meters**, making it perfect for large spaces.

* Based on internal testing on 4-Way Cassette, AC140RN4DKG/EU, with a PCNUFMAN blade. Results may vary depending on environmental factors and individual use.

WindFree™ Cooling (Energy Saving)

Reduces energy use by 55%* to save costs

Optimize power usage with the 4Way Cassette's energy-efficient WindFree™ Cooling. In WindFree™ mode, up to 55% less electricity is used compared to normal cooling mode*, so you can stay comfortably cool without worrying about electricity bills.

* Based on internal testing of the Wind-Free™ model AC140RN4DKG/EU working at 14.0KW. Operating conditions: outdoors (35°C DB / 24°C WB), indoors (27°C DB / 19°C WB). Results may vary depending on environmental factors and individual usage.

10m Long Wind**

A big blade sends cool wind farther

The 4Way Cassette has an optimized 84mm big blade, 31% larger than normal*, that delivers cool air up to 10 meters without "dead zones". Two times the distance of a conventional 4Way system**.

* Compared to a conventional 4Way Cassette with a 64mm blade.
** Based on internal testing on 4Way Cassette, AC140RN4DKG/EU, with a PCNUFMAN blade compared to a conventional 4Way model with a PC4NUSKAN blade. Results may vary depending on environmental factors and individual use.

WindFree™ Cooling

None of the cold drafts, all of the comfort

The 4Way Cassette's WindFree™ Cooling disperses cool air across the room through 15,700 micro air holes to create a "Still Air" environment*. It eliminates uncomfortable drafts, so that people in the room stay comfortable.

* ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) defines "Still Air" as when the velocity of air is below 0.15m/s, so people cannot feel any cold drafts.

WindFree™ Cooling (Quiet Operation)

Less detectable noise, Less disturbance

During WindFree™ operation, the 4Way Cassette generates only 34dB(A) of sound, which is significantly less than normal cooling mode*. This makes it ideal for quiet environments such as libraries and schools.

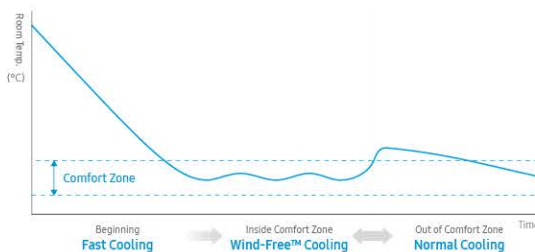

* Based on internal testing of the WindFree™ model AC071RN4DKG/EU. It generates a noticeable reduction in the 1kHz noise band, which is the weakest level of sound that humans are sensitive to.

Smart Comfort Operation

Automatically adjusts to create a comfort zone

The WindFree™ 4Way Cassette cools a room to your comfort zone as fast as possible, before switching to WindFree™ Cooling mode. Should the temperature dip out of a comfortable range, the cassette readjusts automatically.

Lightweight Main Unit

Effortless handling, easy fitting

Unlike conventional air conditioners, the main unit of the 4Way Cassette is made of plastic plates and is approximately 30% lighter*. The lightweight construction makes it much easier to handle, set up and install.

* Based on internal testing compared to competing air conditioners: Samsung (4Way) ACD71RN4DKG/EU = 14.5kg vs A competitor's model = 21kg.

Motion Detect Sensor (MDS)*

Automatic savings with less energy use

With the absence of movement in a room, the 4Way Cassette's Motion Detect Sensor* switches to WindFree™ mode after 30 minutes and enters standby after 60 minutes, reducing energy consumption by up to 50%**.

* This function is optional. An MDS Kit is required (sold separately): MCR-SMC for the WindFree™ 4Way.
** Based on internal testing of WindFree™ models comparing up to 2 hours continuous operation after the start of the "away" mode vs. 80 minutes operation using the MDS setting. Operating conditions: outdoor unit: AC140RXADNG/EU, indoor unit: AC140RN4DKH/EU (panel: PC4NUFMAN). Standard cooling operation: outdoors (35°C DB / 24°C WB), indoors (27°C DB / 19°C WB). Results may vary depending on environmental factors and individual usage.

Fresher Air Intake

Better ventilation, complete air purity

Maintain a healthy indoor environment by introducing fresh outside air to the room simply by connecting a Fresh Air Intake hose. Circulation of clean air prevents stale air, mold and bacteria.

AIR PURIFYING PANEL

Even more comfort with even cleaner air

Integrated air purifier in air conditioner unit - Air conditioning and air purifying all at once.
With this new air purifying panel you can assure that indoor air quality is safe even in high foot traffic establishments such as retail outlets, restaurants, cafés, and offices.

PM1.0 Filter

Pre-Filter

*Purifying panels are certified by the Korea Air Cleaning Association

Fresher & Cleaner Indoor Air

Pure air, always there

Enjoy fresher & cleaner indoor air with the purification panel that comes with two types of filters : Pre-Filter & PM1.0 Filter
The PM1.0 Filter sterilizes up to 99% of microorganisms that are collected in the filter, as verified by Intertek.*

* Tested at test lab in Korea for sterilization performance. Data has been measured under specific testing conditions and may vary depending on environmental factors and individual use.

High Cleaning Performance

Fast cleaning in large areas

With large cleaning area of up to 157 sqm, and high CADR of up to 19.9m³/min, it cleans air fast and powerfully, even in large spaces like offices & restaurants.

Based on 14kW models.
CADR : Clean Air Delivery Rate , Cleaning area : The area with height 2.4m & air purifier can reduce air pollution ratio by 50% in 10mins.

Thorough Purification

Removes up to 91% ultra-fine dust

As a result of the Purification Test* that was conducted in a classroom, 58% of ultra-fine dust were removed after Purification operation for 10 minutes, and up to 91% of ultra-fine dust were removed after Purification operation of 30 minutes.

WindFree™ 1WAY CASSETTE

Gentle cooling even with limited space

The Samsung 1Way Cassette air conditioner's WindFree™ Cooling, cools effectively without the unpleasant feeling of chilly wind being blown directly onto your skin. Its energy-efficient operation means the outdoor unit uses less electricity compared to normal mode*. The 700mm big blade with a wider operating angle creates a comfortably cool environment for every corner of your space.

WindFree™ Cooling

Efficient cooling without the harsh breeze

Stay comfortably cool without the sensation of cold drafts with WindFree™ Cooling. Cool air is gently dispersed across the room through 10,000 micro air holes, which creates a "Still Air" environment* with a very low air speed of 0.15m/s. There are no drafts to disturb you and you won't feel too hot or too cold.

* ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) defines "Still Air" as when the velocity of air is below 0.15m/s, so people cannot feel any cold drafts.

Slim and Compact Design

With the height of only 135mm, the slim WindFree™ 1Way Cassette is compact. Its slim design does not only make it visually pleasing but also easy to fit in the smallest ceiling gaps.

* Based on 3.6kW model. 5.2kW & 7.1kW measure 138mm.

Lighter Indoor Unit

Samsung applies ABS material to the WindFree™ 1Way Cassette to provide a lightweight (10.6kg) indoor unit. This slim and lightweight design makes installation and maintenance a breeze.

No overflowing drain water

The check valve on the drain pump prevents water from flowing backward into the drain pan. This minimizes the drain pan's water level so that you will never have to worry about water stagnation or overflowing of drain water in your interior space.

SLIM DUCT

Flexible installation options and easy maintenance

The Samsung Slim Duct air conditioner has a 2-way air inlet and a slim design. With its 199mm height and 700mm width*, you can choose its location with more flexibility. It can be discretely concealed and easily installed. A filter cleaning indicator automatically notifies you when the filter is due for cleaning after 1,000 hours of operation**.

* Based on the AM036KNLDEH/EU model. The width of other models may vary.
** 1,000 hours is the default setting, but this can be adjusted to 2,000 hours on the internal PCB.

2-way Air Inlet

Adaptable installation, inconspicuous cooling

The Slim Duct features a 2-way air inlet – bottom or rear – that gives you more flexibility in selecting an installation location. It can be configured to suit almost any room, providing optimum airflow to the surrounding space while discretely blending in behind ceilings.

Slim & Compact Design

A space-saving option for homes and offices

With a height of just 199mm and a width of 700mm*, the Slim Duct's compact design is highly elegant and unobtrusive, so it can be discretely concealed while enhancing the look and feel of almost any space. Its easy installation, maintenance & repair, provide wide range of businesses a suitable and effective solution for cooling and heating.

* Based on the AM036KNLDEH/EU model. The width of other models may vary.

DUCTS

All your duct needs in one versatile unit

The Samsung Duct S air conditioner is 25% smaller and 30% lighter than conventional air conditioners*, thus fitting easily into small spaces while delivering consistently cooling and heating. This feature instantly optimizes air volume and pressure while minimizing noise.

* Based on internal testing comparing the Samsung Duct S AM030MNHDC/AA model with the conventional AM030JNHDC/AA model. Volume: Duct S = 210L vs. Conventional = 280.8L. Weight: Duct S = 40.5kg vs. Conventional = 58kg.

Auto ESP Adjustment

Automatically more comfort & performance

For maximum comfort and efficiency, the Auto ESP Adjustment senses external static pressure (ESP) and adjusts fan speed to optimize air volume and pressure and ensuring consistent cooling and heating with minimum effort in any environment. The ESP is also easily adjusted via remote control, reducing installation time.

Easy Installation & Maintenance

Save time, effort and space

The Samsung Duct S air conditioner is simple to install, handle and maintain. It's compact and light design make it easy to maintain and repair.

BIG CEILING

Quickly and efficiently cools more space

The Samsung Big Ceiling air conditioner is a deceptively simple looking indoor ceiling unit that delivers a powerful but efficient cooling performance. It blends into any space and creates a comfortable, tranquil environment by blowing cool air much farther. As fewer units are required, this also saves money, space and installation time.

Powerful Cooling

Big area, potent cooling

The Big Ceiling air conditioner's powerful cooling means you can cool a large area in a short time, using a low number of indoor units. It blows cool air over a long distance, up to 15 meters, which is 70% more than conventional units*. With one unit able to cover every 20sqm area, money, space and installation time is saved.

* Based on internal testing. Results may vary depending on environmental factors and individual use.

Simple & Unique Design

Modern and minimalist design

The Big Ceiling air conditioner has a harmoniously seamless minimalist design. The aerodynamic enlarged blade and geometric grill maximizes its efficiency while blending in seamlessly. Its simple aesthetic display provides clear status information, which serves as an enhancement for both the look and air quality of any space.

CONVERTIBLE CEILING

Maximizes the space without compromising on comfort

Under-ceiling mounted air conditioning units are perfect for large areas such as galleries, workshops, offices and commercial premises that have limited floor and wall space. Installed under the ceiling or as a free-standing floor unit, it has a minimal footprint that maximizes the use of the available floor space, while being powerful enough to cool a large area.

Dimensions (W x H x D mm)
1,000 x 200 x 650

Weight (kg)
20

Two-way Installation

Ideal cooling setup your space deserves

Two-way installation lets you to choose the best solution for your requirements. This efficient, cost-effective and elegant design allows the unit to be deployed under the ceiling or as a free-standing floor unit. If space is limited and airflow needs to come from above, the ceiling setting is ideal, while the floor standing option is perfect when room is abundant.

Slim and Compact Size

Flexible and economical

The Convertible Ceiling unit is slim and compact, enabling a wider choice of installation locations, even though its cooling power is comparable to larger products. Its smaller size and lighter weight means businesses benefit from reduced set-up costs.
